

Stock Exchange Release no. 15/2004

Article in the Danish daily Børsen

In today's edition of the Danish daily Børsen an article is speculating on the majority shareholders of Columbus IT Partner negotiating on a sale of the Company.

As previously announced, among other things in the Annual Report 2003, the Company still wishes to take the lead in a necessary consolidation of the sector so as to boost competitiveness whilst also ensuring critical mass for Columbus IT Partner's most important markets.

The Company's board of directors and management can inform that no specific negotiations on a sale of the Company are going on.

Carsten Dilling
Chief Executive Officer
Columbus IT Partner A/S
